ABSTRACT

This study offers information concerning enrollment in U.S. institutions of higher education in Fall 1970 and a comparison of the 1970 data with 1969 enrollment figures. Highlights of the findings include: (1) the final tabulations of enrollment for Fall 1970 show an increase of 7.2% over that for 1969; (2) enrollments in publicly controlled institutions continued to grow faster from 1969 to 1970 than in privately controlled institutions, at 9.0% and 2.2%, respectively; (3) enrollments in private 2-year institutions have substantially declined for the second straight year - down 6.0% from 1969 to 1970, following a 10.4% decline from 1968 to 1969; (4) public 2-year colleges followed a 12.2% gain in enrollment in 1969 with a 13.7% gain in 1970; and (5) the proportion of total enrollment accounted for by full-time students declined from 68.7% in 1969 to 67.8% in 1970. HIGHLIGHTS

The final tabulations of enrollment for fall 1970 showed an increase of 7.2 percent over that for 1969, from 8,066,233 in 1969 to 8,649,368 in 1970.

Enrollments in publicly controlled institutions of higher education continued to grow faster from 1969 to 1970 than in privately controlled institutions, at 9.0 percent and 2.2 percent, respectively. The enrollment gain in public institutions since 1968 was over a million students.

An important factor contributing to the low growth rate of the private sector was the substantial decline of enrollments in private 2-year institutions for the second straight year--down 6.0 percent from 1969 to 1970, following a 10.4-percent decline from 1968 to 1969.

In contrast, public 2-year colleges followed a 12.2-percent gain in enrollment in 1969 with a 13.7-percent gain in 1970.

The number of students enrolled in extension programs surpassed the 400,000 mark but increased at a lesser rate (4.8 percent) than overall enrollment.

The proportion of total enrollment accounted for by full-time students declined from 68.7 percent in 1969 to 67.8 percent in 1970, contributing to a downward trend of 3 percentage points during the past 5 years.

FOREWORD

This is the final report on enrollment in institutions of higher education in fall 1970. It contains information acquired on the second of two fall enrollment questionnaires in the Higher Education General Information Survey for 1970-71.

This publication also concludes a 2-year experiment (1969 and 1970) during which a two-questionnaire technique was employed to survey fall enrollment. It was hoped that a brief, basic information questionnaire due relatively early in the fall term (October 15) would provide simple national and State aggregates to users who needed these data early in the school year for planning, budgeting, and other purposes. A questionnaire requesting more detailed supplementary information as to level of enrollment and type of program, due a month later than the first, would provide material for detailed research and analysis.

In fall 1969, the first year in which the two-questionnaire technique was utilized, a number of difficulties prevented the timely publication of any 1969 fall enrollment data. In fall 1970, the strategy was successful. The results of the early basic survey were published in a preliminary report on November 23, 1970, with more detailed reports following at later dates. This report is the last of those.

This procedure requires the allocation of extraordinary resources, which cannot continue to be made available. Therefore, the two-questionnaire device has been abandoned in favor of a single questionnaire in the fall of 1971, retaining the format of the "supplementary information" form. Current plans call for a sample to be taken within the context of this survey, and preliminary State and national estimates will continue to be published as quickly as possible. The use of a single fall enrollment questionnaire will allow the NCES more freedom to conduct special enrollment surveys from time to time.

As always, the U. S. Office of Education appreciates the time and effort of college and university registrars and other officials whose contributions in providing data were essential to the success of the survey and the publication of this report.

INTRODUCTION

This is one of three reports resulting from two surveys of fall 1970 enrollment in higher education conducted by the U. S. Office of Education. Besides presenting both aggregated data and data for individual institutions from the second survey, this report relates statistics from both surveys and shows comparisons with those from the 1969 and 1968 fall enrollment surveys.

The first 1970 questionnaire, Opening Fall Enrollment (Higher Education), 1970--Basic Information, with response due early in the fall term, made a minimal request for total enrollment and enrollment of first-time students by sex and by attendance status. That survey provided basic information for an early report--Opening Fall Enrollment in Higher Education, 1970: Report on Preliminary Survey (OE-54003-70).

The second fall 1970 questionnaire, Opening Fall Enrollment (Higher Education), 1970--Supplementary Information, was due a month later than the first, after enrollments had become more stabilized. This second survey requested more detailed data by type of program and by level and category of enrollment.

Part of the information acquired by means of the second 1970 questionnaire was published earlier in the report Fall Enrollment in Higher Education, 1970--Supplementary Information: Institutional Data (OE-54051-70). Besides a facsimile questionnaire displaying national aggregates for each data cell, the report comprised three listings of detailed enrollment data by institution. One listing supplied data on students in programs chiefly creditable toward bachelor's or higher degrees, distributed according to residence status, level of enrollment, sex, attendance status, and State. Another presented data on undergraduate students in resident bachelor's-degree-credit programs, separated into lower division and upper division enrollment and further classified by sex, attendance status, and State. The third listing was composed of enrollment data for students enrolled in programs not chiefly creditable toward a bachelor's degree, classified by residence status, sex, attendance status, and State.

COMPARISONS OF FINDINGS, 1970 AND 1969

Institutions of higher education reported a total enrollment of 8,649,368 in fall 1970. This was an increase of 7.2 percent over the corresponding total for 1969, a somewhat greater rate of increase than the 6.5-percent rate of increase from 1968 to 1969.

Enrollment by Level and Control of Institution [1]

By level, the 160 universities showed the smallest relative growth, 4.6 percent; 2-year institutions as a group showed the greatest, 12.4 percent. Other 4-year institutions showed a 6.4-percent increase in enrollment.

The differences in the rates of increase by level of institution become more pronounced when publicly controlled institutions are examined separately. Public universities experienced a 5.2-percent increase in enrollment; other public 4-year institutions, a gain of 8.9 percent; and public 2-year institutions, 13.7 percent. These rates of growth compare with 1969 percentage increases of 7.2, 6.9, and 12.2, respectively. It is particularly noteworthy that while the rates of increase for other 4-year institutions and the 2-year institutions were greater in 1970 than in the previous year, for the 95 publicly controlled universities the rate of increase was 2 percentage points lower in 1970. This falling off of the rate of increase in enrollment from 1969 to 1970 may be an indication that many public universities are reaching the maximum limit of manageable operating capacity (size); or it may be that economic considerations are generating public encouragement of such a trend, and the student's own declining resources are making this kind of choice for him.

The rates of change in enrollment for the various levels among privately controlled colleges and universities present a striking contrast to those for public institutions. The rate of increase at all private institutions as a group was 2.2 percent from fall 1969 to fall 1970, almost double the 1.2-percent rate for the previous year. At private universities and other private 4-year colleges, enrollments increased by 2.8 percent and 2.7 percent, respectively, from fall 1969, for virtually the same rate as from 1968 to 1969. On the other hand, enrollments at private 4-year colleges decreased for the second straight year, but at a lower rate--6.0 percent for 1970 compared to 10.4 percent for 1969. The reader should bear in mind, however, that the number of private 2-year colleges in 1968 was 271; in 1969, 253; and in 1970, 238. [2]

1/ Definitions for the three major types of institutions appear in appendix I.

Sex and Attendance Status

Following the pattern of a decade, the percentage increase in the number of women students greatly surpassed that for men, although the enrollment of men topped 5,000,000 for the first time. In the fall of 1970, 41.3 percent of students enrolled were women, up from 40.8 percent in fall 1969.

The enrollment of full-time students was 5,865,475--an increase of 5.8 percent over 1969. Part-time enrollments increased by 10.3 percent, to 2,783,893. Full-time students constituted 67.8 percent of total enrollment, down from the 68.7-percent level of 1969. This contributed to a gradual but persistent downward trend of some 5 years duration, amounting to a drop of about 3 percentage points in the proportion of total enrollment accounted for by full-time students.

Bachelor's or Higher Degree-Credit Students

The enrollment in all colleges and universities of students in programs leading to bachelor's or higher degrees increased to almost 8 million, a 5.9-percent increase over that for 1969, which was itself an 8.0-percent increase. The rate of increase in 1970 for men was 5.0 percent; for women, 7.2 percent.

For purposes of comparisons of undergraduate and postbaccalaureate resident degree-credit students in 1970 with those in the 1969 enrollment report, "unclassified" students have been combined with the undergraduates. Available evidence indicates that very few unclassified students are actually enrolled at the postbaccalaureate level. The enrollment of this composite undergraduate category in 1970 increased by 5.5 percent over that in 1969. For men the increase was 4.5 percent; for women, 6.8 percent. "Postbaccalaureate" enrollment--first-professional and graduate students combined--increased by 8.2 percent, following an 8.0-percent increase in 1969.

Enrollment of first-professional students as a separate group increased by 5.0 percent. The number of men students increased by 6.3 percent, offsetting a 7.0-percent decrease in the number of women enrolled. Further, one finds that the number of full-time first-professional students--both men and women--increased, but that the number of part-time students decreased for both sexes. The number of full-time men students increased sufficiently to more than offset the loss in part-time enrollment:

Sex and enrollment status	1969	1970
TOTAL	166,250	174,544
Men	150,111	169,537
Full-time	132,076	144,959
Part-time	18,035	14,578
Women	16,139	15,007
Full-time	11,954	13,307
Part-time	4,185	1,700

Enrollment of resident graduate students increased by 8.7 percent, encompassing increases in all categories by sex and by attendance status. Male students increased by 7.6 percent; female students, by 10.6 percent. But the enrollment of full-time students--both men and women--actually decreased slightly in universities--both public and private. All other groups among these subcategories showed increases.

Extension Enrollment

Enrollment in college and university extension programs in the fall term of 1970 numbered 405,077, of which slightly more than half (50.4 percent) were men. This total represents a 4.8-percent increase over extension enrollment in fall 1969. Among these, the number taking work creditable toward a bachelor's or higher degree was 376,089, an increase of 7.8 percent over that in 1969. On the other hand, the number of extension students taking vocational education courses not chiefly creditable toward a bachelor's degree was 28,988, down 23.0 percent from the 37,671 reported in 1969. Students in these occupational courses accounted for only 7.2 percent of total extension enrollment, a rather sharp drop from the 9.7-percent level of a year ago.

Enrollment in Terminal-Occupational Programs

The reported enrollment of students in terminal-occupational programs in fall 1970 showed a sizable increase over the reported 1969 enrollment in the same programs. The reported 1970 enrollment was 664,000, 26.9 percent more than the 523,000 reported in 1969. Examination of 1968 enrollment data, however, shows that a total of 588,000 students were reported in terminal-occupational programs, apparently indicating that a loss of 65,000 students had occurred in these programs from 1968 to 1969. Then, in fall 1970, reported enrollment in terminal-occupational programs rebounded to 664,000. On the surface, it would seem that enrollment in terminal-occupational programs fluctuates rather drastically from year to year.

However, further scrutiny of terminal-occupational enrollments presents a number of interesting insights. For example, a breakdown by type of program of enrollments for publicly controlled 2-year colleges in the State of California for 1968, 1969, and 1970 is particularly revealing:

Type of program	1968	1969	1970
TOTAL	600,425	626,618	694,132
Bachelor's degree-credit	399,852	491,221	487,811
Terminal-occupational	200,573	135,397	206,321

This large drop in 1969 of students reported in terminal-occupational programs in California's public 2-year institutions most likely stemmed from difficulties experienced by the more than 90 institutions in the California community college system--as by many other institutions--in classifying students by type of program. Large numbers of students in terminal-occupational programs find that they are able to transfer most of the credits earned in such programs to a bachelor's program in a 4-year institution, even though the intent of the program is to prepare the student for employment in a particular occupation. It is easily seen that a shift in reporting in 1969 of 65,000 or so students from the "bachelor's degree-credit" category to the terminal occupational category would have almost exactly offset the decrease in terminal-occupational enrollments for the whole United States in that year. Such a shift of reported enrollment data for the State of California in those two broad program areas would have made the 1969 enrollment split for California fit very neatly into the 1968-70 enrollment pattern.

Of course, wide variations in enrollment of students in terminal-occupational programs in public 2-year institutions were not restricted to California alone; such institutions in the State of Maryland, for example, as shown in the following tabulation, showed a drop in terminal-occupational enrollment of 64 percent from 1968 to 1969, but the decrease in actual numbers of students was only 4,520--less than 10 percent of the loss in California. Also, only a quarter of this loss, about 1,100 students, was recouped in Maryland in 1970.

Terminal-occupational enrollment	1968 enrollment	Percent change, 1968-69	1969 enrollment	Percent change, 1969-70	1970 enrollment	Percent change, 1968-70
All institutions	7,511	-69.1	2,863	34.0	3,837	-48.9
Public 2-year institutions	7,068	-64.0	2,548	43.4	3,655	-48.3

No other State experienced a sizable loss in terms of absolute numbers in terminal-occupational enrollments from 1968 to 1969. As a matter of fact, a few States with large numbers of students enrolled in terminal-occupational programs actually showed increases from 1968 to 1969 and further substantial increases in 1970:

	1968	1969	1970
Florida	18,893	21,298	24,991
Michigan	32,713	33,316	46,007
North Carolina	16,260	24,212	27,707
Wisconsin	11,762	19,949	26,900

With the exception of California, the net effect of the various State-by-State increases and decreases in terminal-occupational enrollments from 1968 to 1969 was virtually no change in the national total. Because the public 2-year colleges in California enroll such a large proportion of the students in terminal-occupational programs in the United States, any marked change in the reporting of enrollments in these programs by the California institutions has a pronounced impact on the U. S. total:

	1968	1969	1970
U. S. total	588,543	523,241	663,836
California	200,573	135,397	206,321
California as percent of U. S. total	34.1	25.9	31.1

While the enrollment in terminal-occupational programs increased by 26.9 percent overall, the enrollment in such programs actually declined in privately controlled institutions by 15.3 percent. Enrollments decreased in private universities and 2-year colleges but increased in other 4-year colleges. Among publicly controlled institutions, universities showed a drop in vocational enrollments, but other 4-year colleges and 2-year colleges showed gains--the latter by 34.1 percent.

Enrollment of First-Time Students

The enrollment of first-time students in fall 1970 increased by 4.8 percent over that in fall 1969, to top 2 million for the first time. Public institutions showed a gain of 6.3 percent, but private institutions experienced only a slight gain of 0.2 percent. Women students increased at a considerably faster pace than men, 7.3 percent compared to 2.9 percent; in actual numbers, the increase in women was double that of men--63,048 compared with 33,204. Women comprised 44.3 percent of the enrollment

of first-time students, compared to 41.3 percent of total enrollment a difference of 3.0 percentage points. The reported enrollment of first-time students in bachelor's degree-credit programs increased by only 1.8 percent in fall 1970, while reported first-time students in non-bachelor's degree-credit terminal-occupational programs increased by 29.7 percent. The reader is reminded, however, of the problem of classification by type of program and of the likelihood of inconsistent reporting in 1969.

Differences Between the Basic and Supplementary Fall Enrollment Surveys for 1970

The collection of fall enrollment statistics for 1970 on two separate questionnaires spaced a month apart led inevitably to two different sets of enrollment statistics. 3/ The two-questionnaire procedure was also used in fall 1969. In that year the later survey produced a total enrollment of almost 88,000 more than the basic survey, a difference of only 1.1 percent. In fall 1970, the difference was reduced somewhat to 83,000, or 1.0 percent. Because of the relatively early due date, tabulations developed from the basic survey should be considered preliminary, derived in part from early estimates. Data from this, the supplementary survey, reported after most enrollments had stabilized, can be considered final and official. The following summation of statistics from the two 1970 surveys will be useful in making comparisons for analytic purposes:

3/ This procedure has been discontinued beginning with fall 1971, when only a single opening fall enrollment questionnaire will be used, retaining the format of the 1969 and 1970 "supplementary" questionnaire.

I. Survey Background

II. Survey Report Form

APPENDIX I. SURVEY BACKGROUND

Survey Population

The Education Directory, 1969-70, Higher Education (OE-50000-70) was the primary source for the list of institutions included in the survey on which this report is based--with such changes in the fall of 1970 that were known by the Office of Education. The survey population for this survey was identical with that used in the survey Opening Fall Enrollment (Higher Education), 1970--Basic Information.

Institutions of higher education included in this report are classified either as 2-year or 4-year institutions, with universities set out as a separate sub-classification of the latter. The 4-year institutions are those that offer programs extending at least 4 years beyond high school. They comprise all institutions that grant bachelor's or higher degrees or some recognition equivalent to such degrees; e. g., ecclesiastical recognition in theological institutions. They may also offer organized occupational programs of less than 4 years that result in an associate degree or some other recognition of completion such as a certificate or diploma. Universities are those institutions that give considerable stress to graduate instruction and have at least two professional schools that are not exclusively technological.

The numbers of institutions in the fall 1970 survey and, for comparison, the 1969 survey, were as follows:

	1970			1969		
	Total	Public	Private	Total	Public	Private
All institutions	2,565	1,093	1,472	2,536	1,065	1,471
4-year institutions	1,673	439	1,234	1,646	428	1,218
Universities	160	95	65	160	95	65
Other 4-year	1,513	344	1,169	1,486	333	1,153
2-year institutions	892	654	238	890	637	253

Supplementary vs. Basic Questionnaire

There were two major differences between the questionnaires used for the two 1970 fall enrollment surveys. One important difference was that the due dates were a month apart--the "basic" questionnaire returns being due October 15 and those for the "supplementary" questionnaire, November 15. The other difference, of course, was that the basic

questionnaire was very simple, asking only for total enrollment and for students enrolled in college for the first time, both by sex and by attendance status. On the other hand, the supplementary questionnaire requested more detailed enrollment data--by type of program and by level and category of enrollment, again with the breakdowns by sex and by attendance status. In addition, however, the 1970 supplementary questionnaire included one further data dimension not included on the basic form or the 1969 supplementary questionnaire; that is, the full-time-equivalent enrollment for each data category on the form.

For the convenience of the reader, the questionnaires for both 1970 fall enrollment surveys, including the definitions and instructions to respondents, are reproduced in appendix II so that comparisons in this report of data obtained in the two surveys may be put into proper perspective and be therefore more meaningful.

Total enrollment figures for the 2,565 institutions in both surveys have been inserted in each data cell of the respective forms. Complete responses were received from all 2,565 institutions for both surveys--thereby requiring no estimates or imputations to be made by the Office of Education for any of the data categories.

1970 Supplementary vs. 1969 Supplementary Survey

There was one major difference between the supplementary enrollment questionnaires used for the two years. The 1970 questionnaire requested full-time-equivalent enrollment for each data category on the form, whereas the 1969 form did not. However, as might be expected in this initial attempt to obtain full-time-equivalent enrollment, most institutions were unable to provide usable data. In addition, a small but significant number of reporting institutions experienced difficulty in reporting and resources were not available to follow up to the extent necessary. Finally, many institutions that did provide reliable data chose to use the method suggested on the questionnaire itself: full-time-equivalent enrollment is equal to the number of full-time students plus one-third of the number of part-time students. In consideration of the foregoing circumstances, and in the interest of consistency, it was decided to calculate the full-time-equivalent enrollments on the same basis for all institutions, notwithstanding the excellent reporting by a number of institutions. Therefore, all full-time-equivalent enrollment figures that appear in this report--in summary tables only, for analytical purposes--were calculated according to the method suggested on the questionnaire. No full-time-equivalent enrollment figures are shown for individual institutions.

Questionnaire Editing

Each report form filed in this survey was compared with both the report form filed for the 1970 basic information survey and that filed for the 1969 supplementary information survey, for each institution. Large differences in enrollment figures were accepted if reasons for the differences were readily apparent. If further explanations were needed, institutions were contacted by letter or telephone for verification or revision of the figures reported. These procedures undoubtedly eliminated many of the larger reporting errors, but the extent to which small unrecognized errors may remain is unknown.

For the convenience of the reader as well as for ease in statistical tabulation, totals have not been rounded but are given as they were obtained--by simple addition of the figures for individual institutions. This does not imply that totals and subtotals are accurate to the last digit. It was believed, however, that the data could be more conveniently used if the many subtotals obtained in the analysis were reported in such a way that they would add arithmetically to the totals. Also, in view of the care with which the data were compiled by the registrars and reviewed by the Office of Education, it seemed appropriate that the totals reflect the individual reports.

NOTE: Data acquired in this survey will be published in listings by individual institutions.

If you need additional clarification on any item, please call Mr. George H. Wade, (202) 962-7301, in Washington, D. C.

If exact counts are lacking for a group that should be reported, please include an estimate for that group.

Please fill out a separate form for the main campus and for each branch or other campus. Do not fill out separate forms for EXTENSION CENTERS. Extension students should be reported on the form for the main campus.

PLEASE COMPLETE THIS FORM *(including reverse)* as soon as detailed enrollment breakdowns are available, but no later than November 15, 1970.

Do not include in this report:

(a) Students in noncredit adult education courses.
(b) Students taking courses at home by mail, radio, or television.
(c) Students enrolled only for "short courses."
(d) Auditors.
(e) Students studying abroad.
(f) Students in any branch campus or extension center in a foreign country.

If totals on Line 18 of this form differ greatly *(i.e., by more than 5 percent)* from those on Line 1 of OE Form 2300-2.3, 3/70, please explain.

One additional category of information is being requested this year that was not included on last year's form: the full-time equivalent enrollment *(column 6)* for each headcount total in column 5.

Please enter in column 6, on the appropriate line, the full-time equivalent which you may have already calculated for any of the corresponding headcount totals in column 5.

If you have not previously calculated full-time equivalent enrollment, the following method is suggested:

> ADJUSTED HEADCOUNT METHOD – Full-time equivalent enrollment equals the headcount of full-time students plus one-third the headcount of part-time students.

You may use the above method or any other method of calculating full-time equivalent enrollment most appropriate and/or convenient to your institution. If you do not calculate full-time equivalent enrollment figures, the U.S. Office of Education will make the calculations, using the "Adjusted Headcount Method."
